

Dr Tim Gregory

After completing his undergraduate degree in Geology with Planetary Science at the University of Manchester in 2015, Tim embarked on a PhD in Cosmochemistry at the University of Bristol where he researched the chronology of the early Solar System using meteorites.

After a postdoctoral research project continuing his PhD research, Tim took a sideways career step into nuclear chemistry. Tim is an author of a popular science book (Meteorite), regular public speaker, and has presented science on BBC Sky at Night, BBC Bitesize, and BBC Radio.
